

2018 WILSONART® QUARTZ DESIGN GUIDE

• DESIGN INSPIRATION •

The 2018 Wilsonart Quartz designs capture the same natural beauty of granite or marble stones, but offer a refined color palette, flawless structures and longer-lasting performance.

INNOVATION

Wilsonart Quartz is a non-porous surface resistant to stains with no sealing or polishing required. Comprised of up to 93% quartz crystals – one of the strongest minerals on earth – abrasions and scratches are no match. Wilsonart Quartz comes in various sizes and can also be expertly fabricated into unique edge profiles, including a reverse knife edge.

• MASTERFUL MIXOLOGY •

For commercial and residential interiors, Wilsonart® Quartz is highly prized for its beauty, resilience, and versatile ability to seamlessly blend with any style. Solids or woodgrains, complementary hard surfaces and even metal laminates like bronze or gold can provide a cohesive, on-trend design.
